

Veronika Saiadian

305-783-4361 | veronikasaiadian@gmail.com | [LinkedIn](#) | [GitHub](#) | [DevPost](#) | Burbank, CA

SKILLS

Technical: C++, SQL, Git, Python, JavaScript, HTML, CSS, Java

Tools: Visual Studio Code, Unity

EDUCATION

University of Southern California (USC)

Bachelor of Science in Computer Science, Physics minor | GPA: 3.7

- Discrete Math · OOP C++

Aug 2025 - May 2028

California State University, Los Angeles (CSULA)

Bachelor of Science in Computer Science & Physics (Double Major) | GPA: 3.9

- Intro Python · Intro Algorithms · Intro Relational Databases · Linear Algebra · Physics Mechanics

Aug 2024 - May 2025

EXPERIENCE

National High Magnetic Field Laboratory (MagLab)

May - August 2026

Intern

Tallahassee, FL

- Incoming Summer Intern

Forged Vault Games

Dec 2024 - Present

Game Developer

Remote/CA

- Designed 3 game levels for alpha testing, using Unity and C#; implemented C# scripts featuring adaptive camera modes such as player-follow with look-ahead, room-constrained viewing with deadzone damping, and axis-locked scrolling
- Collaborate with a peer designer on level layout and mechanics; contribute to team planning for design direction

LEADERSHIP & ACTIVITIES

NSF CI Compass Fellowship

Jan - April 2026

Remote

- Completed training in the basics of command-line workflows, Git version control, Docker containers, and Python for scientific computing
- Gained hands-on experience with FAIR data systems, cloud computing, and machine learning through lectures and labs
- Collaborated on a group project, presenting on the cyberinfrastructure of the NSF SAGE facility

Kode with Klossy | Data Science Camp

July 2025

Scholar

Remote

- Explored data science fundamentals: SQL, Python, Tableau, with emphasis on ethical and activist applications
- Collaborated in a team of 4 to design a Tableau dashboard analyzing the impact of socioeconomic factors, study habits, and lifestyle (sleep, diet, exercise) on teens' academic performance and mental health

Girls Who Code | Summer Immersion Program

July - Aug 2024

Remote

- Developed websites using HTML, CSS, and JavaScript, including an educational platform on the war in Ukraine and an old-style personality quiz
- Explored machine learning, and using starter code, utilized libraries to train a Decision Tree and explored the basics of constructing a neural network model with Python
- Gained hands-on experience with NumPy, pandas, and Matplotlib for data preprocessing and visualization

Association for Computing Machinery (ACM) | CSULA

Sept 2024 - Feb 2025

Administrative Officer

- Led logistics and planning for club events, including game nights and study marathons
- Created and distributed weekly newsletters to 80+ members with curated internships, networking events, and technical opportunities
- Recorded meetings to ensure task alignment and accountability across 5 club committees

PROJECTS

Open Alpha | USC

Sept 2025 - Jan 2026

Game Developer

- Developed and prototyped UI components for the in-game audio system, including SFX and BGM controls
- Wrote end-game progression system with conditional scene transitions triggered by player XP

AI-Powered Memorization Assistant

April 2025

Hacktech | CalTech Hackathon

- Engineered prompt workflows to reduce irrelevant outputs and enhance decision support
- Collaborated with a teammate on UI and logic workflows to maximize usability for business teams
- Used OpenAI API, Google Colab, and Anvil to prototype the assistant and demonstrate intelligent summarization and actionable insights
